ALEJANDROGUARIN

Digital Transformation Consultant

Co-founder of Ninus Design & technology and Lici/mátic with +4 years of experience in new business development, web development, digital transformation, and innovation management. I am passionate about cloud computing and technology. As a business manager with skills in Javascript, React, Node, MongoDB, GCP cloud, SDLC, and many other technologies, I am capable of create, structure, develop and implement strategies for digital transformation with Agile methodologies (SCRUM) while coupling with business processes and translating user requirements into software specifications.

WORK EXPERIENCE

Lici/matic, INC. • COO 2019-2020

my main goal is to ensure that we achieve our mission by translating our aspirational goals into actionable objectives. I served as the SCRUM master for the teams in Puerto Rico and Colombia. The stack implemented in this project was Javascript JQuery, Golang, Node.js, SQL. I launched a dozen of different features of the application together with a team of 10 developers located in 4 locations in 3 Countries. I executed and headed the operations in Colombia outpacing the past performance of the company by consolidating more than 3000 new users only in Colombia while in charge. The stack implemented in this project was Javascript JQuery, Golang, Node.js, SQL.

2016-2019

Ninus D&T • Co-founder Product owner

I Designed and formalized +50 different IT projects for a wide diverse number of industries and clients, including universities, banks, massive consumer companies, and many more. I decreased the cost of change of IT systems by successfully serving as the bridge between business requirements and system specifications, decreasing the costs of planning and reformulation of projects by nearly 40% percent.

"I am obsessed with technology and the implications that its development will bring to humanity. My purpose is to be part of the digital disruption forefront and to bring change in the way that people experiences life. I am an intensely curious individual, distinguished for asking persistent and difficult questions that challenge our days. I am a believer that everything can be achieved with the right team, therefore I will do everything that is in my power to bring out the best of the individuals around me"
